SUMMARY

Data professional (MS Information Science, UW–Madison, May 2026) working across the full data stack — building reliable pipelines, predictive models, and multi-agent AI systems, and translating results into decisions stakeholders can act on.

SKILLS

Languages	Python, SQL, R
Data Engineering	PySpark, Databricks, Airflow, dbt, Microsoft Fabric, Delta Lake, Kubernetes
ML / AI	XGBoost, scikit-learn, SHAP, LangGraph, Google ADK, MCP, RAG, NLP
BI & Visualization	Tableau, Power BI, Looker, Matplotlib, Seaborn, Plotly
Cloud & Tools	AWS, GCP / BigQuery, Snowflake, Qdrant, Docker, Git

EXPERIENCE

Graduate Research Assistant — University of Wisconsin–Madison	Sep 2025 – Present
- Built a retraction-risk forecasting pipeline over 19,000+ author clusters (XGBoost, Random Forest), reaching R^2 0.604 / MAE 0.013 with rigorous out-of-time validation to prevent temporal leakage. - Engineered a 21-variable analytical dataset from heterogeneous sources and used SHAP to identify authorship turnover as the strongest predictor, translating findings into plain-language guidance for faculty.	
Data Analyst (Apprenticeship) — MSA Professional Services	Sep 2025 – Dec 2025
- Built an ETL/ELT pipeline in Microsoft Fabric automating ingestion of 50+ daily CSV files, eliminating 10 hours of weekly manual data entry. - Automated schema-change detection across 100+ monthly files with PySpark, cutting manual validation time by 95% and quarantining anomalies before reporting.	
Data Analyst Intern — AlmaMeal Media Pvt. Ltd.	Aug 2023 – May 2024
- Built a Python customer-data pipeline that improved customer-to-service match rates by 12%; refactored 7+ legacy SQL queries to cut runtime by 30%. - Created Tableau funnel dashboards that surfaced a 40% drop-off at a critical step, directly driving a UI redesign.	

SELECTED PROJECTS

Clinical Operations Copilot — Multi-Agent System (Google ADK, MCP, Groq, DuckDB). Auditable multi-agent system turning a clinic-network warehouse into compliance-safe executive briefs, with a deterministic SQL groundedness check on every figure and a live audit trail.

Payments Fraud Detection (GCP, BigQuery, dbt, XGBoost, LangGraph). End-to-end pipeline over 590K transactions reaching AUROC 0.89 on a 3.5% fraud rate, plus a natural-language investigation agent for analysts.

Nexus360 — Salesforce AI Agent (LangGraph, FastAPI, Qdrant). Production agent over a live Salesforce org with RAG knowledge search and human-in-the-loop approval gating every write operation.

EDUCATION

M.S. Information Science — University of Wisconsin–Madison	Sep 2024 – May 2026
B.S. Electronics & Computer Engineering — University of Mumbai	Aug 2019 – Jun 2023

CERTIFICATIONS

McKinsey Forward Program · Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate · 5-Day AI Agents Intensive with Google (Kaggle)
